In compliance with the EU Data Protection Directive 95/46/EC and its supporting legislation, the data collected about the partners shall be processed fairly and not used in ways that are beyond the scope of the partner search, for which the data was collected.

Organisation	Lead Partner	Project idea	Partners wanted	Location	Email
University of Salento- Department of Engineering for Innovation	University of Salento- Department of Engineering for Innovation	The project aims to improve energy performance of Albania and Montenegro regions by enhancement of policies on energy efficiency and renewable energies, which will lead to reduced energy consumption and greater energy security, with connected socio-environmental and economic benefits. Project focuses interregional exchanges to build regional competencies on energy topics and to support regional policy instruments.	Central public institution, Local public institution, Other body governed by public law, Private non-profit organisation	Montenegro , Albania	maria.malvoni@unisalento.it
University of Salento	University of Salento	To deal with EU energy efficiency targets, improvements of the regional policies are needed. The project aim to promote energy efficiency in public buildings and to improve the capacity of public authorities in regions to undertake efficient renovation works of their public building stock, thus saving energy and public resources. Objectives of the project are: 1) improve policy instruments 2) improvement skills at regional level 3) involve and engage of stakeholder to create a system, in which improved approaches are understood, supported and disseminated.	Central public institution, Local public institution, Other body governed by public law, Private non	Montenegro , Albania	maria.malvoni@unisalento.it

University of Salento	University of Salento	Energy Performance of Buildings Directive (EPBD) requires Nearly Zero-Energy Buildings (NZEBs) in 2020. The integration of RES for self-consumption in NZEB buildings remains a challenge for most of all the Member States, which have not included it in their National Directives. The introduction of RES for self-consumption in buildings is not considered as cost-optimal energy in every country. Regional authorities have a key role to play in identifying their cost-optimal RES in order to mobilize local stakeholders and creating new policies to support the integration of RES in buildings. The overall objective is to promote new policies and to improve of existing policies, to support the integration of RES in buildings for self-consumption in each region.	Central public institution, Local public institution, Other body governed by public law, Private non	Puglia Region, Molise Region, Montenegro, Albania	maria.malvoni@unisalento.it
MedAlb Institut	MedAlb Institut	Innovative technologies for a clean environment and food safety	Central public institution, Local public institution, Other body governed by public law, Private non-profit organisation	Puglia Region, Montenegro	medalbinstitut@yahoo.com
Power sea saver di Marco Casamassima	Power sea saver di Marco Casamassima	We are looking for partnership with Albanian Company that can build up and manage a network of mechanics with experience in the LPG system for automotive and willing to learn how to apply our technology for LPG fuelling to sea engines. This partnership should involve LPG distributing Companies as LPG pumps should be built at the marinas and ports so to have an easy access to refuelling.	private companies	Montenegro, Albania	sales@powerseasaver.com
Associazione Borghi Autentici d'Italia - Authentic Villages of Italy Association	Union of Municipalities of Grecia Salentina - Unione dei Comuni della Grecia Salentina	Project aim is to create the conditions for an effective reduction of risk determined by energy poverty and the non-availability of local energy resources, as well as by certain risks from climate change. Essential to the achievement of project objectives is strengthening skills and development of strategies, management approaches and financing schemes by Local Authorities that will serve as a basis for achieving greater energy efficiency and increasing the resilience of territories. The project will focus in area with high density of natural-environmental heritage	Central public institution, Local public institution, Other body governed by public law	Montenegro, Albania	taddei@borghiautenticiditalia.it
Patto Territoriale Nord Barese Ofantino	Patto Territoriale Nord Barese Ofantino	Our project aims to implement the Covenant of Mayor in the Programme Area. Other body governed by public law	Other body governed by public law	Puglia Region	agociciriello@gmail.com

Municipality of Campobasso/Comune di Campobasso		The Municipality of Campobasso is interested to contact and to be contacted by other stakeholders to develop common project proposals related to the Programme's PA2. Particularly the aims of the projects should concern these themes: <ul style="list-style-type: none"> <li>•Development of local sustainable energy action plans;</li> <li>•Reduce carbon emission by employing innovative energy efficiency solutions such as circular approach, smart grid, etc;</li> <li>•Increasing energy efficiency and renewable energy usage in public infrastructures.</li> </ul>	Central public institution, Local public institution, Other body governed by public law	Puglia Region, Montenegro, Albania	sabrina.tirabassi@comune.campobasso.it
Public Utility Company Kotor / DOO Komunalno Kotor" Kotor		Project in the field of environmental protection	Central public institution, Local public institution, Other body governed by public law	Puglia Region, Molise Region, Albania	zastitazs@jpkpkotor.com
